

KALAKONDA SAIRAM

Software Developer | .NET, APIs & AI-Assisted Engineering
sairamkalakonda1998@gmail.com | linkedin.com/in/sairam-kalakonda | +91 7013883110

PROFESSIONAL SUMMARY

Developer with 4+ years of experience designing, building, and maintaining software components, APIs, and internal tools using C#, ASP.NET MVC, and Entity Framework, with a strong foundation in object-oriented design, architectural patterns, and database schema development across SAP HANA SQL and SQL Server. Experienced integrating AI-assisted coding tools (Codex, Antigravity) into daily development work to accelerate code drafts, test generation, and documentation, while validating every output for correctness, security, and maintainability before use. Comfortable translating business and user requirements into tested, documented, maintainable solutions, and collaborating with cross-functional, remote teams including business stakeholders, QA, and infrastructure partners.

TECHNICAL SKILLS

Programming Languages: C#, Python, Java, JavaScript

Web & API Development: ASP.NET MVC, .NET Core, WCF, SAP B1 Service Layer (REST APIs), HTML, CSS, Bootstrap, jQuery

Database & Data: SAP HANA SQL, SQL Server, MySQL, SQLScript, Database Schema Design

AI-Assisted Development: Codex, Antigravity, AI Copilot Integration, AI-Output Validation & Review

Testing & Version Control: Git, Unit Testing, Automated Testing, Debugging & Troubleshooting

Development Practices: Object-Oriented Design, Architectural Design Patterns, Agile, WPF

PROFESSIONAL EXPERIENCE

Technical Consultant (Web Developer) | 10X Software Solutions

Aug 2023 - Present

- **Software Development:** Developed, tested, and maintained .NET components, internal tools, and REST APIs across the SAP B1 ecosystem, applying object-oriented principles and architectural design patterns to keep solutions reusable and maintainable.
- **AI-Assisted Development:** Used AI coding tools (Codex, Antigravity) to draft code, generate tests, and produce documentation, validating each output for correctness, security, and alignment with internal standards before deployment.
- **Intelligent Automation:** Architected and integrated an AI Copilot into SAP B1 web applications and built a WhatsApp-based bot for real-time approvals, automated reporting, and system alerts, translating business requirements into working automation.
- **HR-Facing System Delivery:** Leading end-to-end development of an Employee Self-Service (ESS) Portal (ASP.NET MVC + SAP HANA), a direct employee/HR-process-facing system, coordinating requirements and delivery with a remote, cross-functional team.
- **Database Engineering:** Designed database schemas and refined HANA stored procedures and queries to support core business processes, improving query response time by 30%.
- **Quality Assurance:** Implemented unit tests and automated testing practices to catch defects early, and participated in troubleshooting and code review to reduce production issues.
- **UI/UX Development:** Built responsive, accessible enterprise UI components using Syncfusion and jQuery event delegation.

Project Engineer (Web Developer) | Wipro Limited

Mar 2021 - Nov 2022

- **Backend Development:** Designed and optimized backend services using WCF and Entity Framework, reducing server resource consumption by 15%.
- **Requirements & Planning:** Facilitated Agile requirement-gathering sessions, translating user stories and business requirements into working software delivered within established timelines.
- **Platform Delivery:** Spearheaded development of the Commercial LRD (Microsoft Store Checklist Platform), improving operational output by 25%.
- **Reliability:** Built and maintained high-performance web applications, troubleshooting issues across environments using logs and tests to increase platform stability and reduce page load times.

KEY ACCOMPLISHMENTS

- **AI-Assisted Engineering:** Built and validated production AI Copilot and WhatsApp automation features within SAP B1, direct, hands-on experience with the responsible AI-assisted development workflow this role calls for.
- **Intelligent Reporting:** Built an automated report generation tool integrated with SAP HANA that produces complex reports in multiple formats.
- **Scalability & Reliability:** Refined system architecture and database design to support a 50% increase in user traffic without performance degradation.
- **Recognition:** Awarded Best Performer of the Quarter at 10X Software Solutions for driving project success and productivity.

EDUCATION

B. Tech, Computer Science and Engineering | Kamala Institute of Technology and Science, Karimnagar

2016 - 2020
